ABOUT US

ABOUT SAMLEX SECURITY SERVICES LTD.

Samlex Security Services Ltd is a registered company in Kenya offering security services and integrated security systems. Our head office is located at Professional center, Ngong road.

To continously develop appropriate and cost effective security solutions in Kenya and in collaboration with all its stake holders to meet their security needs, in the spirit of co-operation, trust and patnership.

OUR MISSION

To achieve clients' satisfaction by providing affordable and quality security services.

CORE VALUES

Our company values of integrity, Teamwork, attitude, performance and passion were carefully chosen and form the framework for our commitment and outstanding customers services as well as guiding our daily activities.

We have made significant investments in technology to ensure both our internal and external processes deliver outstanding customer service and real time information.

We place significant emphasis on training our people, which allows us to leverage best practices in the industry.

We have made significant investments in technology to ensure both our internal and external processes deliver outstanding customer service and real time information.

OUR VISION

To be the company of choice in provision of private security services.

THE COMPANY AT A GLANCE

OUR RANGE OF SERVICES

01 MANNED GUARDING

Our manned guarding service supports homes, offices, residential estates and commercial premises across Kenya. Carefully recruited, vetted and trained guards provide a visible security presence, manage entry points and carry out patrols suited to your property.

We agree on duties and day or night coverage around your site's risks and daily activities. Round-the-clock supervision, clear shift handovers and customer-care training help maintain consistent protection for your people, property and visitors.

02 DOG SERVICES (K9)

Our dog services pair trained security dogs with skilled handlers to strengthen patrols and deter intruders at properties in Kenya. This added security presence is particularly useful for residential compounds, warehouses, farms and sites with large perimeters.

Handlers guide the dogs during patrols, including night duties, while working alongside your guarding arrangements. We discuss your site layout, access points and security concerns to identify where a dog-and-handler team can provide practical support.

OUR RANGE OF SERVICES

03 RISK ASSESSMENT & MANAGEMENT

Our risk assessment service helps property owners and businesses in Kenya understand their security vulnerabilities before choosing a solution.
We work with you to review access points, existing protection, daily operations and areas where people or assets may be exposed.

Site surveys and risk reports guide practical recommendations for guarding, surveillance, access control and perimeter protection.

We prioritise measures around your needs and budget, helping you build a coordinated security plan rather than investing in equipment or staffing without a clear purpose.

04 FIRE FIGHTING EQUIPMENT

We supply, install and service fire fighting equipment for homes and workplaces in Kenya. Fire extinguishers provide an important first line of response to small fires, with equipment selection and placement considered around your premises and the risks present.

Servicing helps keep equipment ready for use, while guards trained in fire response procedures support your site's emergency arrangements. We discuss your equipment needs and maintenance requirements so fire preparedness forms part of your wider security plan.

OUR RANGE OF SERVICES

05 CCTV INSTALLATION

We design, install and maintain CCTV systems for homes, shops, offices and other business premises in Kenya. A site survey helps identify entrances, activity areas and blind spots, so camera placement matches what you need to monitor.

Our service covers camera installation, system setup, servicing and remote viewing where the equipment and connection support it. We help you choose a practical setup for your property and budget, with coverage that supports both everyday oversight and reviewing incidents.

06 RAPID RESPONSE & BACKUP

Our rapid response and backup service connects alarm systems and panic buttons with security support for properties in Kenya. A siren, power supply and remote panic button help raise an alert, while guards on patrol can use wireless buttons to call for assistance.

The service supports your on-site security when an incident needs additional attention.

We discuss your location, communication arrangements and available response coverage before deployment, so you understand how alerts and backup will be coordinated for your premises.

OUR RANGE OF SERVICES

07 ELECTRIC & RAZOR WIRE FENCING

Our electric fencing and razor wire installations strengthen perimeter protection for homes, farms, estates and business premises in Kenya. These barriers help discourage unauthorised entry and add another layer of security alongside guards, gates and other site measures.

We review your boundary layout and existing fence to discuss an appropriate installation. Repairs, maintenance and alarm integration help keep the perimeter effective over time. Your quote is tailored to the site's size, condition and protection requirements.

08 PRIVATE INVESTIGATION

Our private investigation service offers a confidential starting point for individuals and businesses in Kenya seeking clarity on a specific concern.

We discuss your situation, available information and the questions you need answered.

A case-specific assessment establishes whether we can assist, the scope of work and a suitable approach within lawful boundaries.

CAREERS CORNER

RECRUITMENT & TRAINING.

Our recruitment and training process is designed to ensure that all security personnel meet the required standards of professionalism, integrity, competence, and discipline.

We carefully select and train guards based on their qualifications, experience, and the specific security needs of each client.

REQUIREMENTS

All prospective security guards must meet the following requirements:

- Physical and Mental Fitness: Demonstrate the physical and mental fitness necessary to perform security duties effectively.
- Education and Literacy: Possess a minimum KCSE qualification of Grade D and be able to read, write, and communicate effectively in both English and Kiswahili.
- Required Documentation: Submit the following documents for verification:
  - Two recent passport-sized photographs.
  - Valid National Identity Card.
  - KCPE and KCSE certificates.
  - School leaving certificate and any other relevant academic or professional certificates.
  - Valid Certificate of Good Conduct, subject to authenticity verification.
  - Reference letters from referees, accompanied by copies of their National Identity Cards.
  - An introduction letter from the area Chief.
  - Sketch maps indicating the applicant's residence and home area.
- Employment History and References: Provide recommendations from previous employers.
- Assessment and Interviews: Successfully complete oral and written assessments to evaluate suitability, communication skills and general competence all around.

Our training covers the following areas:

- Foot drill
- Standard security operating procedures
- Qualities of security personnel
- Security searches
- Handing/taking over procedures
- Communication skills
- Information gathering
- Code of ethics
- First aid
- HIV/AIDS awareness
- Customer care
- Fire response procedures
